AHDC

AUSTRALIAN HEALTH DESIGN COUNCIL

PRELIMINARY PROGRAM v1

Tour Details

The success of the 2019 Northern Europe Study Tour that visited hospitals in The Netherlands, Belgium, Denmark, and Sweden, came from a perfect balance between learning, networking with peers and local hosts, and enough time for Rest & Recreation.

On the 2023 tour we will visit health facilities in France and Switzerland – and we are looking forward to repeating our previous success!

On the back of the European Health & Design Conference in London (Monday 12 – Wednesday 14 June), we take the fast and comfortable Channel Tunnel Train from Paddington Station to Paris on Wednesday late afternoon for an early evening arrival. This gives you enough time to check into the hotel of your choice, and spend a lovely spring evening strolling along the Seine or exploring the small or fancy restaurants of Paris.

Thursday starts with a visit to the Institute Imagine, the [Imagine Institute of Genetic Diseases](#) by Jean Nouvel. In the afternoon we visit the studios of the international firm [AIA Architects](#) for a presentation about health architecture in France.

Friday morning early we take the train to Reims, about an hour North-East from Paris, for a tour of the massive [Centre Hospitalier Universitaire de Reims](#). [Groupe 6](#) has designed the first phase of the new Hôpital.

As Reims is in the middle of the Champagne region, we can not go past a [tasting opportunity](#) at one of the local champagne brand cellars in the beautiful medieval city centre. You can choose to spend the evening here or return to Paris.

KEY TOUR HIGHLIGHTS

Institute Imagine by Jean Nouvel
Centre Hospitalier Universitaire de Reims
Hôtel Dieu Hospital
"Baureals" (Hospices Civils de Lyon)
Gerflor factory
Lyon architectural exploration tour
Geneva University Hospital
Geneva Sustainability Centre

Saturday morning we visit [Hôtel Dieu](#), the oldest continuously operating hospital in the world in the centre of Paris. Saturday afternoon and Sunday are for you to discover Paris, go to the Louvre, eat and drink and be merry!

Monday morning we take two hours and eight minutes for the 465 km to Lyon in the South of France. It is not called Train Grande Vitesse for nothing, clearly. We plan to arrive around midday, to give you time to settle into your hotel, and get to know Lyon a bit in the afternoon.

Tuesday and Wednesday are organised in collaboration with the French company [Gerflor](#). We start with a visit to the Gerflor factory in Tarare, to learn about the latest developments in floor and wall coverings for health facilities.

After lunch by Gerflor, and back in Lyon, we go on an Architectural Exploration, and visit Le Monolith by MVRDV, The Orange Cube by Jakob + Macfarlane, Coop Himmelb(l) au's Musée des Confluences and Le Corbusier's La Tourette.

Wednesday we go to the [Lyon-Villeurbanne Medipole](#). With 740 beds, this is the largest private hospital in France.

Lyon to Geneva is two hours by train on Thursday morning. We visit the Geneva University Hospital, which has just embarked on a large renewal project, starting with a new [Children's Hospital](#). We end the day with a presentation by the [Geneva Sustainability Centre](#). Powered by the International Hospital Federation, GSC was launched 2022 in response to the need for hospitals and healthcare services to address climate change.

Friday morning we train to Lausanne to see the new Children's Hospital, part of the Lausanne University Hospital.

In the afternoon we finish the Study Tour with a visit to the Olympic Museum.

Institute Imagine
(Imagine Institute of Genetic Diseases) by Jean Nouvel
Paris, France

STOP 1

STOP 2

Centre Hospitalier Universitaire de Reims.
Reims, France

Hôtel Dieu Hospital
Paris, France

STOP 3

STOP 4

Visit "Baureals" (Hospices Civils de Lyon)

JUNE		Morning	Afternoon
14 Wednesday	London - Paris		Train to Paris
15 Thursday	Paris	Imagine Institute of Genetic Diseases	Visit AIA Architects Lunch at AIA
16 Friday	Paris - Rheims - Paris	Centre Hospitalier Universitaire de Reims	Champagne tasting
17 Saturday	Paris	Hôtel Dieu Hospital	R&R
18 Sunday	Paris	R&R	R&R
19 Monday	Paris - Lyon	Train Paris - Lyon	
20 Tuesday	Lyon - Tarare - Lyon	Visit to Gerflor factory in Tarare Lunch at Gerflor	"Baureals" Hospices Civils de Lyon
21 Wednesday	Lyon	Lyon Architectural exploration tour	Lyon Old Town Food Tour
22 Thursday	Lyon - Geneva	Train to Geneva	Geneva University Hospital Presentation by Geneva Sustainability Centre
23 Friday	Geneva	Lausanne Children's Hospital	Olympic Museum END of Study Trip

As in 2019, we organise the visits to the health facilities and the architects, as well as the non-health-design-related activities.

You make your own way to Paris, and book your own hotels - giving you the choice to 'star-it-up or down' according to your wishes and expectations.

The Tour fee covers:

- Transport during the tour to the planned facilities and activities
- Hospital visits
- Non-health-design-related planned activities (such as champagne tasting tour, food tour, museum)

The Tour fee DOES NOT COVER:

- Food & drinks not described in this brochure
- Any activity not described in this brochure
- Accommodation (budget estimate for 10 nights: AU \$3,000)
- Personal purchases during the tour activities

Tour fee: \$2,000

We are traveling through France - known for its culinary delights. It is NOT known for being vegan, gluten-free, shellfish intolerance or dairy-free intolerance tolerant.....

The meals provided as part of the tour will cater to vegetarians as much as possible. If you have any other intolerances, you will have to organise your own food or negotiate your own meals with the restaurants.

About AHDC

The Australian Health Design Council's goals are to establish and promote a shared vision for high quality, efficient and effective health facility design that responds to the needs of the Australian populace. Our vision is of an industry sharing knowledge, information, technology, research and experience to promote consistency and effectiveness of health design across all projects – in both public and private sectors.

Members come from both the 'user' side; Executives and Managers dealing with Facility Management, Patient Experience, and Planning, for private and public hospitals, health districts, and aged care, and from the 'supplier' side; architects, engineers, and other associated consultants specialising in health facility design, as well as product and services providers to these groups.
